

Istanbul wins World Hydrogen Energy Congress for the first time!

Aug 11, 2016

Shares

Istanbul will host the world's most well-known conference in the field of hydrogen energy in 2022! WHEC hosts more than 10,000 scientists, participants, researcher, engineers along from more than 60 countries. The organization provides participants, exhibitors, and sponsors numerous opportunities to share and exchange scientific information with global leaders in the business, government, and scientific communities.

The congress, of which Prof. Dr. Nejat Veziroglu will be the honorary chairman, and Prof. Dr. İbrahim Dincer, the chairman, is expected to be a milestone in terms of efforts to deliver global energy solutions. This event aims to make a key contribution to the carbon-free policy of the International Panel on Climate Change (IPCC).

The World Hydrogen Energy Congress, in particular, has been transformed into one of the most important energy events in the world and was first held in Miami, Florida in 1976.
